

DIPLOMA IN TAROT THERAPY

COURSE PROSPECTUS

This course offers a chance to develop and deepen existing skills, knowledge and ability with the Tarot. The focus of this Course is on use of the Tarot for personal healing and development and providing professional therapeutic readings for others.

COURSE DETAILS

Source material for the book is taken from my books 'Tarot Therapy' Volumes 1, 2 and 3. The Course takes place over one year, consisting of twelve days, each focussing on a different aspect of working with the Tarot. Each day includes reading supervision, meditative work and development exercises.

The Course is open to those who have completed the Certificate in Tarot Therapy Course and those who can demonstrate a working knowledge of the Tarot. The Course is therefore suitable for those wishing to develop themselves personally, /spiritually/psychically, using the Tarot as the basis for this. The Course is also suitable for those who wish to establish or develop their existing Tarot reading practice. It is not a Course for those wishing to learn 'fortune-telling'.

The Course is an experiential and transformational one and as such involves a good deal of work on student's own healing and personal and spiritual development. Students will be required to contribute to this process within the group, where personal issues may be discussed and methods of healing these issues explored. This is the best method of learning to be able to do the same for others and is necessary to work at this level with the Tarot. Ongoing support and guidance is available to deal with any issues that may be raised. All that takes place on the Course will be treated as confidential by all involved in it and students' views, experiences and opinions will be honoured.

It is assumed that students will own at least one pack of Tarot and be conversant with this. It is not necessary for students to have a new or different pack for this Course, though changing packs during the Course is not uncommon. Guidance on suitable packs will be given if required.

On successful completion of the Course, students can be awarded a 'Diploma in Tarot Therapy'. Award of the Diploma will be made from continual assessment through the Course and is dependent on completion of a Tarot project and case studies, as detailed in the Syllabus below.

DIPLOMA IN TAROT THERAPY

Possession of a 'Diploma in Tarot Therapy' is intended to recognise a level of professional knowledge and use of the Tarot, together with the ability to assist individuals in their healing, and personal and spiritual development through the use of the Tarot.

COURSE SYLLABUS

Each meeting includes theory and practice with emphasis placed on student involvement. There may be discussion subjects, lectures, practical exercises, meditative exercises and consultation practice at each meeting.

There is no homework set between meetings, but students are required to complete the following by the end of the Course:

CASE STUDIES - Students are required to complete an ongoing series of a minimum of three consultations for a minimum of three clients - nine readings in all. . These must be completed by the end of the Course. Details will be given on the first meeting of the Course, together with notes on reporting on the Consultations.

TAROT PROJECT - Students are required to complete an individual Tarot Project during the Course. This will be a body of work relating to the Tarot in some way, to be decided on by each Student. Students are required to submit their idea to the tutor who will then discuss the exact subject with each Student. A separate sheet of notes giving ideas and guidance for this is included with this Prospectus. The Project should be an achievable one, so does not need to be an unnecessarily large body of work.

TAROT JOURNAL - Students are required to keep a 'Journal' throughout the Course. Selecting one card per week (or when the student feels it is time for a change), notes are made on experiences / thoughts / reflections on how they relate to each card as they go. This allows for individual learning on applying the cards to people and life, whilst allowing for each students development using the Tarot as the basis. Notes need not be long, but a summary.

There is no definitive Syllabus set for the Course, each one being determined by the needs and wishes of students. The exact structure of the Course is determined as the Course progresses. In this way maximum benefit can be gained for each student.

At the beginning of the Course students will be asked to identify any areas they would like input on, or specific exercises/areas of the Tarot. The Course will

include a number of 'developmental' exercises using the Tarot, to help facilitate the goals of personal, spiritual and psychic development.

Each meeting will also include time for each students' feedback on their experiences and progress since the last meeting.
